Clinician Support

Built for Vaccine Safety
and Reference

Clinician Support Solutions

Increase accuracy, efficiency, and medication safety; Support your clinicians with standardized reference and safety information plus integrated tools.

RxTOOLKIT[®] Clinical Support Solutions increase precision, efficiency, and staff confidence. Intuitive and easy to use applications provide automation and standardization of procedures and reference information.

New RxWORKFLOW[™] monographs are now available for all 67 vaccine products used in the US today. From Adacel to Zostavax, we have you covered. As the new COVID-19 vaccines become available, they will also be included in our library.

RxWORKFLOW
for Vaccine SAFETY[™]

RxWORKFLOW for Vaccine Safety[™] gives **EVERY CLINICIAN** the information and ability to safely prepare and administer **ANY DRUG IN OUR LIBRARY!**

RxWORKFLOW FOR VACCINE SAFETY[™]

User-friendly drug specific monographs for safer vaccine selection and administration

As with all of our RxWORKFLOW[™] monographs, each vaccine monograph provides the appropriate **drug information, tools, patient education, and procedural information** to support safe preparation and administration. All information is professionally curated, continuously updated, and easy to find including:

- Established Injection Concentrations
- Dose Information by Age
- Use in Specific Populations
- Warnings and Precautions
- Drug Preparation Information
- Drug Administration Information
- Visual Images of Carton, Vial, and/or Syringe
- Printable Patient Education Materials

Summary of Benefits:

- Provides a single source of standardized reference, procedural information, and tools
- Enhances safety, consistency, and standard of care
- Includes specific features and information to address many of the issues responsible for confusion and medication errors with vaccines

Special features found in every RxWORKFLOW for Vaccine Safety[™] monograph:

- Patient Information includes VIS (Vaccine Information Statements) in both English & Spanish
- Direct link to the CDC Vaccine Home Page where VIS documents are available in up to 16 additional languages
- Adverse Reactions section includes direct link to VAERS (Vaccine Adverse Event Reporting System)
